WORK EXPERIENCE

TI SRE @ Google, 2015–2023

In my roles on three different technical infrastructure teams, I supported **large-scale systems** with a focus on **reliability** and **security**. I took an active role in **mentoring**, interviewing and intern hosting.

Focus areas: CI/CD, incident management, release engineering, capacity planning, automation, monitoring and alerting.

SWE + DevOps @ Tech Startups, 2009–2015

As a **full-stack** or back-end engineer I worked at several **early-stage** startups, helping them bring up their technology stack from scratch.

Focus areas: BLE/IoT, container orchestration, streaming pipelines, web frameworks.

Co-Founder @ Ash Foundation, 2017–

As a founding member, I successfully organised several projects in collaboration with elementary school teachers.

Focus areas: mapping, environmental protection.

OPEN SOURCE CONTRIBUTIONS

Currently focusing on **build systems** and **compiler toolchains** (Bazel, Emscripten, etc.) and developing fuzzers for open-source libraries.

Past projects: WebAssembly playground (webnb.dev), LS-Sec reverse-engineering toolkit, taxonomy database utilities, etc.

PERSONAL INTERESTS

Being an active iNaturalist user, I am passionate about exploring wildlife and mapping biodiversity. I enjoy contributing to public datasets like WikiData, OpenStreetMap and others.
