# **ATTILA** OLÁH

TECH INFRA / SITE RELIABILITY ENGINEER

# WORK EXPERIENCE

#### TI SRE @ Google, 2015-2023

In my roles on three different technical infrastructure teams, I supported large-scale systems with a focus on reliability and security. I took an active role in mentoring, interviewing and intern hosting.

Focus areas: CI/CD, incident management, release engineering, capacity planning, automation, monitoring and alerting.

# SWE + DevOps @ Tech Startups, 2009-2015

As a **full-stack** or back-end engineer I worked at several **early-stage** startups, helping them bring bring up their technology stack from scratch.

Focus areas: BLE/IoT, container orchestration, streaming pipelines, web frameworks.

#### Co-Founder @ Ash Foundation, 2017-

As a founding member, I successfully organised several projects in collaboration with elementary school teachers.

Focus areas: mapping, environmental protection.

# OPEN SOURCE CONTIBUTIONS {}

Currently focusing on **build systems** and **compiler toolchains** (Bazel, Emscripten, etc.) and developing fuzzers for open-source libraries.

Past projects: WebAssembly playground (webnb.dev), LS-Sec reverse-engineering toolkit, taxonomy database utilities, etc.

## PERSONAL INTERESTS A

Being an active iNaturalist user, I am passionate about exploring wildlife and mapping biodiversity. I enjoy contributing to public datasets like WikiData, OpenStreetMap and others.
