WORK EXPERIENCE 📁

DevSecOps @ Netstal Maschinen, 2024–present

Hardening on-prem Kubernetes clusters and **modernising legacy systems**. Built internal **AI infrastructure** with LLM cost controls.

Focus areas: LLM/MCP infra, supply-chain security, observability.

Platform SRE @ Namespace, 2024

Designed **fleet-management tooling** and implemented **security hardening** across transport and application layers.

Focus areas: K3s, HCP Vault, Terraform, TLS, Ansible, Go.

Tech Infra SRE @ Google, 2015–2023

Improved reliability and security of large-scale GCP systems across three technical infrastructure teams. Led projects to improve the **observability of Pub/Sub** and safely deliver monitoring and alerting configuration. Mentored engineers and hosted interns.

Focus areas: SLOs/SLAs, distributed systems, incident management, CI/CD, capacity planning.

SWE + DevOps @ tech startups, 2009–2015

Built technology stacks **from the ground up** as a full-stack engineer across several early-stage ventures.

Focus areas: AWS, GCP, streaming pipelines, BLE/IoT, containers.

OPEN SOURCE CONTRIBUTIONS 📖

ACMEv2 EAB client, nixpkgs **contributions**, macOS **DVP+Compose** keyboard layout, WebAssembly **library ports**, **LS-Sec** tooling.

PERSONAL INTERESTS 🏕

Building a bare-metal cluster. TPM-backed PKI, encryption in transit and at rest. Active iNaturalist member, mapping local biodiversity.
